02. May 2018

## ANDERTECH to represent Maguire in the Nordics

We are proud to announce that Maguire, world leading gravimetric batch blending systems provider, has chosen ANDERTECH to be sole distributor of its products in Sweden and Norway

Maguire Products is a global technology leader in Materials Handling systems for plastics molding, extrusion and compounding. Maguire is founded in 1977 with headquarters in Pennsylvania, USA. ANDERTECH is a well-known supplier of equipment for the plastics industry and has represented Maguire in Denmark since the mid-90s.

ANDERTECH will be presenting Maguire at the upcoming ELMIA Polymer fair in Jönköping 15.-18. May.

- Choosing Maguire gives our customers a unique opportunity to enhance production efficiency and product quality, says ANDERTECH CEO Erik Sten Andersen.

- Maguire equipment enables you to reduce scrap along with reducing raw material drying time and the use of colour additives. This means that return on investment on Maguire equipment is only a few months. We are looking forward to presenting the advantages of the Maguire product range to both our existing and our new customers in the Nordic plastics industry.

ANDERTECH is now sole distributor of Maguire in Sweden, Norway and Denmark. Furthermore, effective immediately ANDERTECH is taking over all obligations regarding the unique Maguire 5-year warranty.

Erik Sten Andersen:

- We are welcoming all existing Maguire customers and will try to accommodate all their wishes and requests for support.

Maguire holds a unique position in the plastics industry worldwide. As an example, Maguire provides the most cost-effective Weigh Scale Blenders on the market. The Maguire WSB series are the most popular gravimetric batch blenders worldwide and Maguire recently sold its 50.000th blender. Over 100 models are available to blend up to twelve components at rates up to 3,600 kg/hr and beyond.

Maguire is also the world's largest supplier of liquid color pumps. Further its patented LPD dryer reduces the drying time for raw materials drastically, 40 minutes instead of 4 hours, increasing production efficiency and saving time, material and labour along the way.

At the upcoming ELMIA Polymer fair in Jönköping 15.-18. May, ANDERTECH will present the Maguire product range together with equipment for the plastics industry from Vismec and Entex and ANDERTECH's own production management and monitoring systems A-link and Whisper 4.0.

You can find ANDERTECH in Hall C, booth C 04:27.
